

## LDN : LUER DISPENSING NOZZLE

Stainless steel tubing with tapered tip inserted into standard Luer type body with full double lead thread, 2-piece construction. Fixed overall length design with variable needle length. Tungsten carbide tip with cross groove option is available for cross print pattern dispensing. This is to minimize epoxy-squeeze out for small die while maintaining complete coverage.

### How To Order

	Tool Style	-	Needle	-	Tip	-	Ø T	-	GD	-	GW
	Type - Body - L - Mat'l		Gauge* / ØH		Option		TL x TW
